

This information is preliminary and intended to assist teams in the decision making process as they register for second events. Final details on robot shipping will be available in the 2010 Game Manual, Section 4 Robot Transportation, coming soon.

1st Event	2nd Event	Expected process	Implications for choosing your second play
Traditional	Traditional	<ul style="list-style-type: none"> <li>• Crate and ship your robot on robot ship day.</li> <li>• Your robot is delivered to and from traditional events the way robot crates have always traveled.</li> <li>• If your team earns a berth at Championship the same rules will apply this year that applied last year regarding transportation to and from Championship</li> </ul>	As always, try to avoid back to back events at opposite ends of the country. Back to back events will require special arrangements with Shepard Exposition Services.
Bag & Tag	Bag & Tag	<ul style="list-style-type: none"> <li>• Seal your robot in the bag on robot ship day as directed in the Game Manual.</li> <li>• Make your own arrangements to get your robot in the bag to and from both Bag &amp; Tag events. You may <u>not</u> ship your robot directly to the venue (even at your own expense).</li> <li>• If your team earns a berth at Championship while at a Bag &amp; Tag event you will have until the Tuesday after your final event to pack your robot in a crate and get it into the FedEx system. (You might want to have a crate on standby.)</li> </ul>	When choosing Bag & Tag events, don't forget you'll be bringing your robot with you. Consider travel time and load in and out when picking events.
Traditional	Bag & Tag	<ul style="list-style-type: none"> <li>• Crate and ship your robot on robot ship day.</li> <li>• Your robot is delivered to the traditional event the way robot crates have always traveled.</li> <li>• Before you leave the traditional event, you must bag and tag your robot and have the designated person at the event sign your paperwork. Pack the robot (still in the bag) into your crate for delivery back to your team's workshop location.</li> <li>• Open the crate and make your own arrangements to get your robot (still in its bag) to and from the Bag &amp; Tag event.</li> <li>• If your team earns a berth at Championship event you will have until the Tuesday after your final event to pack your robot in a crate and get it into the FedEx system.</li> </ul>	If your two events are more than one week apart everything should work out fine. If your two events are one week apart and practically next door to one another, go ahead and register for both events, we'll work with you to overcome the logistical concerns.
Bag & Tag	Traditional	<ul style="list-style-type: none"> <li>• Seal your robot in the bag on robot ship day as directed in the Game Manual.</li> <li>• Make your own arrangements to get your robot in the bag to and from the Bag &amp; Tag event.
